

The background of the entire image is filled with a variety of colorful, hand-drawn geometric shapes. These include squares, rectangles, circles, and irregular polygons in shades of red, yellow, green, and blue. Some shapes are solid, while others are outlines, creating a playful and abstract pattern.

Google Architecture Diagramming Tool and New Features

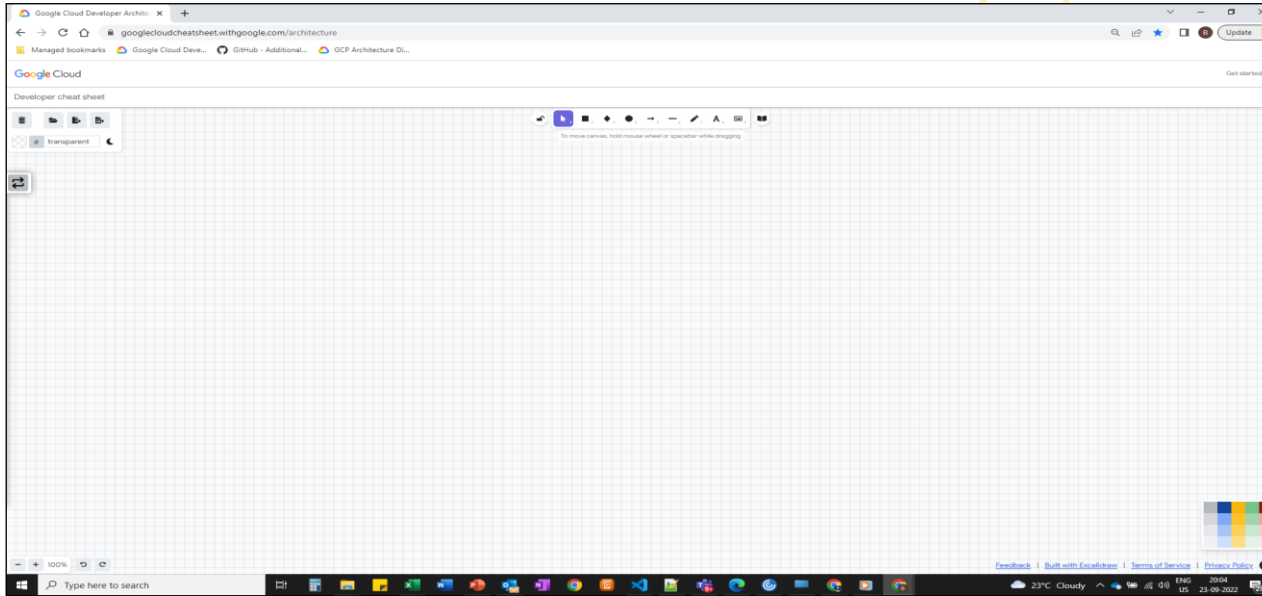

1. **Architecture Diagramming Tool Overview**
2. **Reference Architectures and other features**
3. **Demo**

Overview

- ◎ Build architecture diagrams.
- ◎ Embed easy to access kit having list of all the Google Cloud products and services.
- ◎ Share your diagram with your team and colleagues or add it to documentation.

How do I access it?

Reference Architectures

20+ prebuilt reference architectures for common use cases.

A collection of colorful geometric shapes (squares, rectangles, circles, and rounded shapes) in red, yellow, green, and blue, scattered in the top-left corner of the slide.

You have the use case
reflected visually in the form
of an architecture diagram,
are you ready to implement it
in your project?

A collection of colorful geometric shapes (squares, rectangles, circles, and rounded shapes) in red, yellow, green, and blue, scattered in the bottom-right corner of the slide.

Deploy with one click

Demo

Deploy a Compute Engine
application behind Load
Balancer

THANK YOU!
